

SOFTWARE ENGINEERS

NEW PROJECTS

IMMEDIATE START

TO £25,000

Now hiring for our expanding team in Cambridge

Join our talented software team, working alongside our materials scientists to develop database products and applications that analyse, visualise, share, and use our customers' specialist data.

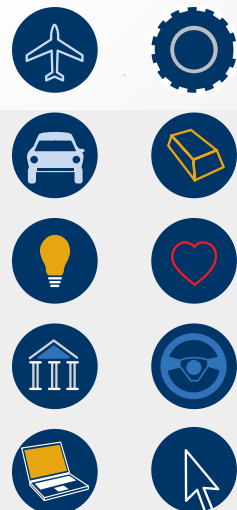

Technologies include C#, C++, client-server .NET applications, relational databases and SQL.

Last summer's graduates are now delivering software that customers are eager to use:

“ It's great to work on software that has a positive impact”
Jacob – Eco Design Software

What we can offer you:

- A competitive salary with a generous non-contributory pension (12.5%), health and insurance benefits, share options
- A friendly team
- Flexible working hours
- A newly refurbished office close to Cambridge city centre, with parking and secure cycle racks
- Proper tea and coffee!

About Us

Granta Design is the worldleader in materials information technology – a fascinating and expanding area of engineering software.

We help companies to apply materials knowledge in order to innovate, to make products safer and more efficient, and to minimize environmental impact.

We are profitable and have grown at 30% year-on-year for five years. A spin-off from Cambridge University,

we offer a unique product and have a great reputation as a company that is open, leading-edge, and flexible.

We provide a high level of autonomy to individuals, realising that motivated and committed staff are the key to our success.
