Firehole Composites data for Granta MI

Release Notes

/\nsys / GRANTA MI

About this database

Firehole Composites contains more than 1600 records covering over 400 composite systems from various sources such as the CMH-17 (formerly MIL-HDBK-17), AGATE and NCAMP programs, and numerous product datasheets and journal articles. The data covers materials composition, processing, mechanical and thermal properties over a range of environmental and test conditions.

How can accessing or installing this release help you?

- Access the latest data from Firehole Composites.

System requirements

This database release is compatible with Granta MI version 2021 R2 or above.

For instructions on adding the database to your Granta MI system, see the installation documentation for your Granta MI release.
