## Contents

- 1. Aims of the EMIT Consortium**
- 2. Development Process**
- 3. Objectives of the Meeting**

## EMIT Consortium Aims

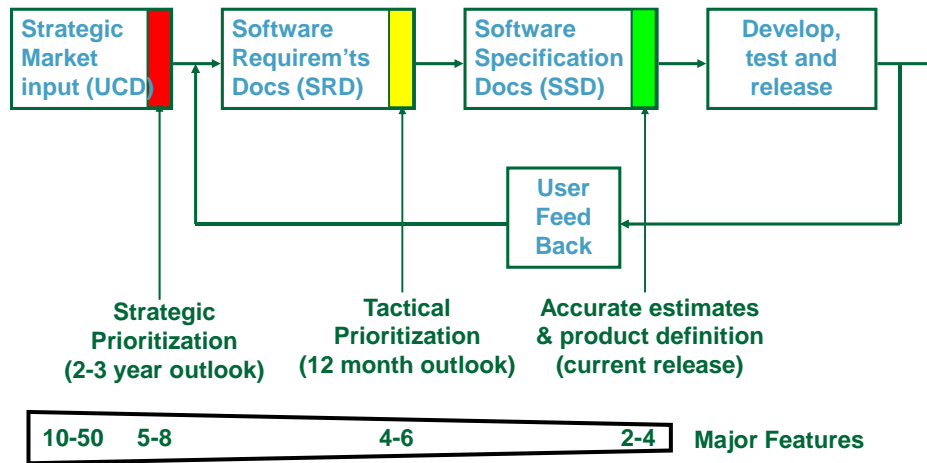

1. Minimize business risk associated with environmental legislation, through material and process information management.
2. Reduce the environmental impact of products through materials and process decisions during design
3. Embed eco-design and product stewardship in normal engineering workflows
4. Combine expertise / resources of members: share costs, effort, benefits

## Development Process

MSDP								Discuss			Review		
SFDP											Discuss		
Develop Docs										UCDs			SRDs

- Discuss:** Preliminary presentation and discussion of features
- ▲ Prioritize:** Consortium vote between meetings
- ▲ UCD:** 2-Page preliminary description of functionality
- ▲ SRD:** Software Requirements Document
- Review:** Review votes, persuade other members, re-vote on same list
- Report:** Granta reports on outcome of process (including all other factors)
- Preview:** Discuss detailed requirements, demonstrate completed features

**Development Projects**  
**MSDP:** Major Software  
**SFDP:** Smaller Feature

# Granta Environmental Software Solution

## Objectives of Meeting

### 1. Integrate:

- Software, data and reporting
- BoM Management systems
- Workflows to maximize benefits

### 2. 'Demo' MI 6.0 (Release Q3, 2012):

- Reference data: Restricted substances, eco impact, substitution
- 'Gateway' software connections

### 3. 'Report' functionality for MI 7.0 (Release Q3, 2013)

- Major Features: review and refine SRDs

### 4. 'Discuss' functionality for MI 8.0 (Release Q3, 2014)

- Compile New Use Cases, prior to prioritization vote
