Contents

- **Developments in MI:Eco Audit in MI v6**
- **Demonstration – MI:Materials Gateway for Pro/E**
- **Legislative update – ISO 14006:2011**
- **Discussion – when, where and how are environmental impacts considered during your New Product Development process?**

Developments in MI v6

- **Eco Audit in Pro/E Gateway**
- **Phase 1 of plan for integrated Eco Audit and Restricted Substances reporting**
- **Phase 1 of plan for PLM BoM import**

Demonstration

- **MI:Materials Gateway for Pro/E**

ISO 14001

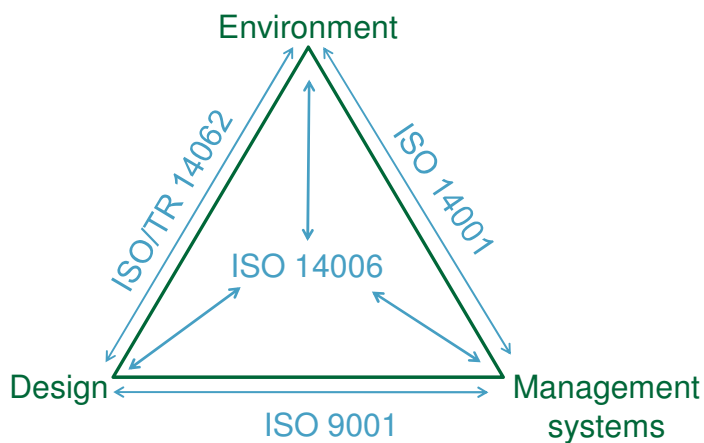

ISO 14001

4.3.1 Environmental aspects

The organization shall establish, implement and maintain a procedure(s)

- a) to identify the environmental aspects of its activities, products and services within the defined scope of the environmental management system that it can control and those that it can influence taking into account planned or new developments, or new or modified activities, products and services, and
- b) to determine those aspects that have or can have significant impact(s) on the environment (i.e. significant environmental aspects).

ISO 14006

ISO 14006

Regarding ISO 14001 clause 4.4.2 Competence, training and awareness

ISO 14006 says:

When identifying competence needs, the organization should take into account any person(s) (from the organization or working on its behalf) who are responsible for product design and development. The organization should ensure that these people are aware of, and have knowledge of, environmental aspects and impacts related to products throughout their life cycle. Alongside other areas, people should have, or should have access to, competence in applying methodologies and tools for the identification and evaluation of environmental aspects of products and for the identification of environmental improvement strategies.

Discussion

Aim:

- **Develop software tools, data sets and workflows that help you deliver more sustainable, lower risk products by building a better understanding of when, where and how environmental impacts are considered during your New Product Development process**

Summary

- **Developments in MI:Eco Audit in MI v6**
