

# Release Notes: StahlDat SX Data Module for GRANTA MI

*July 2017 Release*

The StahlDat SX data module for GRANTA MI incorporates the complete Register of European Steels (known as the "Stahl-Eisen-Liste" in German) augmented with composition, mechanical properties, material forms, and suppliers, plus temperature-dependent properties for many steels.

## What's new in this release?

We have updated the StahlDat SX data module to ensure it contains the complete and up-to-date Register of European Steels, with specification data and temperature-dependent material properties.

- The latest version includes the addition of over 200 American, Japanese, Chinese and Russian standards
- A new "International Standards" property, to help identify equivalent grades from different standards

## How can installing this release help you?

- Up-to-date access to the Register of European Steels information.
- Make comparisons, find substitute materials, and identify available forms and suppliers of metallic materials.

## System requirements

This release of the **StahlDat SX** data module is compatible with GRANTA MI Version 9 and later.

For detailed system requirements and instructions on installing the database, see the installation documentation for your GRANTA MI release.

## **BEFORE INSTALLATION**

If you have a previous version of the data module installed, please note the following **before** installing the new version:

- If you have added or modified any of the FE exporters for this data module, and you have not stored the modified exporter in a `__User_Exporters__` subfolder, you will need to export a copy of these using MI:Admin before installing the new database, and then import the exporters into the new version of the database. Refer to Section 5 of the *GRANTA MI Administrator's Guide* for additional information.
- If you have added or modified any of the unit systems for this data module, you will need to replicate these changes in MI:Admin for the new version.
- If you have added or modified any layouts for this data module for use with MI:Explore, you will need to replicate these changes in MI:Admin for the new version.

## **Further information and contact details**

Additional information about this data module is available on the Granta Design website here:
